PROFESSIONAL SUMMARY

Python Software Engineer with 4 years of experience developing backend systems, microservices, automation tools, and data-processing pipelines. Experienced in FastAPI, Flask, SQL, AWS, CI/CD, and writing maintainable production-grade Python.

TECHNICAL SKILLS

Python, FastAPI, Flask, REST, Microservices, PostgreSQL, Redis, SQL, Docker, AWS, GitHub Actions, pytest, Linux, Bash, Git, CI/CD

PROFESSIONAL EXPERIENCE

Backend Engineer | CloudPeak Technologies, Bengaluru

2022 – Present

- Designed Python microservices using FastAPI and Flask for internal and external business workflows.
- Implemented REST endpoints, request validation, structured logging, exception handling, and service-level monitoring.
- Containerized services with Docker and supported CI/CD pipelines for AWS-based deployments.
- Worked with PostgreSQL and Redis to implement transactional workflows and high-frequency caching.

Associate Software Engineer | DataWorks Systems, Bengaluru

2020 – 2022

- Developed Python automation scripts that reduced repetitive operational tasks for engineering teams.
- Created Flask APIs and database utilities for internal applications.
- Wrote unit tests with pytest and maintained technical documentation for deployed services.

PROJECTS

Inventory Microservices | Python, FastAPI, PostgreSQL, Redis, Docker

Developed inventory, product, and stock APIs with service separation, caching, validation, and automated tests.

Deployment Automation Toolkit | Python, Bash, GitHub Actions

Created command-line utilities for environment validation, log collection, and deployment checks.

EDUCATION

B.Tech. Information Technology | Visvesvaraya Technological University | 2020

ADDITIONAL INFORMATION

Core strengths: Backend Development, REST API Design, Database Integration, Testing, Debugging, Agile Collaboration
