

NAAZ ILAHI MULANI

Ratnagiri, Maharashtra, India • 9158148841 • naazmulani357@gmail.com • linkedin.com/in/naaz-mulani-629489315

PROFESSIONAL SUMMARY

Final-year Information Technology Engineering student with strong analytical skills and practical experience in Python, SQL databases, machine learning, and data visualization. Skilled in building machine learning models, performing data preprocessing, and creating interactive dashboards using Power BI and Tableau. Adept at applying data-driven techniques and core computer science fundamentals to deliver actionable business insights.

TECHNICAL SKILLS

Programming Languages: Python, C++

Data Visualization & BI: Power BI, Tableau

Databases: MySQL, SQL, MongoDB

Core Concepts: Data Structures and Algorithms, Object-Oriented Programming (OOP), Operating Systems

Tools & Platforms: Git, GitHub, Visual Studio Code, Linux, REST APIs

Domains & Competencies: Machine Learning, Data Mining, Data Analysis, Technical Troubleshooting, API Integration, Agile Methodology

PROJECTS

Weather Forecast and Analysis System / *Python, MySQL, REST API*

- Developed a Python application that integrates real-time weather data using REST APIs and stores results in a MySQL database.
- Implemented data validation and debugging processes, reducing API integration errors and improving data accuracy.
- Strengthened troubleshooting and backend development skills through real-time data handling.

Student Dropout Prediction System / *Python, Machine Learning*

- Built a machine learning classification model to predict student dropout risk levels using historical academic data.
- Performed data preprocessing, feature analysis, and model evaluation to improve prediction accuracy.
- Applied analytical and statistical problem-solving techniques to support data-driven decision-making.

Basic File Handling System / *C++*

- Developed a C++ application to perform file read, write, and update operations with structured error handling.
- Designed exception-handling logic to improve program reliability and prevent data loss during file operations.

INTERNSHIP EXPERIENCE

Machine Learning Intern

SunBeam Infotech Pvt. Ltd., Pune | Jun 2025

- Developed real-time machine learning models and pipelines using Python, focusing on data preprocessing and predictive analytics.
- Designed interactive data visualizations and business intelligence reports using Power BI and Tableau to extract key insights.
- Collaborated with technical mentors to analyze complex datasets and solve real-world machine learning challenges.
- Awarded Grade "A" for overall performance and practical execution during the industrial training programme.

EDUCATION

Bachelor of Engineering (B.E.), Information Technology

2023 – 2027

Finolex Academy of Management and Technology, Ratnagiri, Maharashtra

CERTIFICATIONS

Industrial Training & Internship Programme in Machine Learning (Grade 'A') — SunBeam Infotech

Ethical Hacking Internship Credential — EduSkills Academy

AI Automation & Intelligent Solutions Internship — AICTE | IBM SkillsBuild | BharatCares

Data Mining with Python: Implementing Classification and Regression — Infosys Springboard

Getting Started with Generative AI — IBM SkillsBuild

C++ Programming — Infosys

Database & SQL — Infosys

Generative AI Basics — Coursera

SOFT SKILLS

Communication, Problem-Solving, Customer-Focused Approach, Team Collaboration, Adaptability

LANGUAGES

English, Hindi, Marathi
